**Global Access CSG
Announces New Chief Operating Officer**

New York and Minneapolis, April 13, 2015 - Global Access CSG is pleased to announce the addition of Helen Rosen as Chief Operating Officer and Managing Director.

Helen has more than 20 years of experience assisting organizations, from large and mid-market enterprises to early-stage ventures, in the financial services, information services, media, and IT industries, with the design and execution of their growth strategies through M&A, business model innovation, and operational improvement.

“Helen’s multifaceted experience will be invaluable to our clients as we continue to expand the capabilities of our firm,” said Global Access Founder and CEO Michael Macaluso. “Her deep operational and risk management experience will also be an important asset as we invest aggressively in our global platform, governance and delivery model, to tap the tremendous potential we see in our markets.”

“I’m excited to join Global Access at this stage of its development,” said Ms. Rosen. “Although just one year old, the company is already managing several billion dollars of deal value across three continents, and its pipeline continues to grow. A key challenge over the coming year will be to ensure that Global Access is able to continue to support its growth with a first-rate infrastructure and team.”

About Global Access: Global Access CSG is a global consultancy headquartered in Minneapolis and New York with offices in strategic locations around the world. We provide our clients and their partners with innovative, practical strategies and solutions for realizing their growth aspirations with greater certainty and less financial and execution risk. We deliver on this promise through a multi-disciplinary, hands-on model that bridges the cultural, geographic, language and logistical divides that often stand in the way of successful execution. Our principals have completed many billions of dollars of transactions in cross-border, in-country project execution and deal making in many parts of the world, particularly in the U.S., Greater China, Asia-Pacific, parts of the Middle East and Europe.
